PROFESSIONAL SUMMARY

Software Engineering student at Adelphi University with hands-on experience building REST APIs, data pipelines, and concurrent backend systems. Proficient in Python, Java, JavaScript, and SQL, with working knowledge of cloud tools, database design, and API architecture. Dean's List honoree and member of Omicron Delta Kappa.

EDUCATION

Adelphi University

Garden City, NY

Bachelor of Science (BS), Computer Science (Software Engineering). Dean's List, Omicron Delta Kappa (ODK).

May 2027

Relevant Coursework: Data Structures & Algorithms, Computer Networks, C and C++ Programming, Principles of Programming Languages, Database Management Systems, Statistics & Data Analytics, Discrete Structures

EXPERIENCE

Cashier/Sales Associate

Oct 2023 – Feb 2024

TJ Maxx

- Processed purchase transactions using the POS system, handling cash and card payments accurately
- Mentored new hires on POS operation and customer service, improving onboarding and team productivity

Cashier/Sales Associate

Nov 2021 – Jan 2023

Kohl's

- Processed cash, check, and credit card transactions using the store's POS system, maintaining accurate records
- Supervised new associates and delivered on-the-job training on POS operation and customer service

PROJECTS

PantherDelivery: Campus Logistics REST API

Apr 2026 – May 2026

<https://github.com/sabrinak07/PantherDelivery>

- Developed a Python/Flask REST API with 7 endpoints for a robot campus delivery service, supporting package registration, robot assignment, and delivery status tracking
- Implemented RESTful endpoints with JSON bodies and HTTP status codes, following stateless API design principles
- Applied thread-safe write operations to handle concurrent requests and prevent race conditions across shared data stores

Aegis: Defense Intelligence Alert Monitor

Mar 2026 – Apr 2026

<https://github.com/sabrinak07/aegis-defense-intelligence>

- Built an ontology-backed alert monitor in Palantir Foundry and Workshop as part of a Palantir Build Challenge interview initiative, transforming SIPRI and World Bank data into analyst-ready alert records
- Designed a data pipeline to clean, join, and transform raw datasets into a scored alert system with fields for country, year, risk level, and alert reasoning

ACTIVITIES & LEADERSHIP

Association for Computing Machinery (ACM)

Jan 2025 - Present

Active Member

- Participated in coding events, hackathons, and workshops focused on software engineering and AI innovation.

Omicron Delta Kappa Honor Society (ODK)

Jan 2026 - Present

Active Member

- Selected for induction based on high academic standing (top 5% of class); recognized for contributions within scholarship, community service, and campus involvement.

Chabad Jewish Student Group

Aug 2025 - Present

Active Member

- Supported campus community engagement through active participation in cultural and student-led initiatives.

SKILLS

Languages: Python, Java, JavaScript/TypeScript, SQL, C, C++, R, Swift

Frameworks & Libraries: React, Node.js, Flask, PyTorch, TensorFlow

Databases: PostgreSQL, MongoDB, Oracle Database

Tools & Software: Git/GitHub, AWS, Linux/Unix, Xcode

Concepts: REST APIs, Object-Oriented Programming (OOP), Multithreading, Database Design, Data Structures & Algorithms, Networking
